## New: Quest Tool Version 3.3.0

2017-12-03 10:55

**The Quest Tool Version 3.3.0 is available for all Quest Tools released on Dec. 2<sup>nd</sup>, 2017!**

All our available assessment tools (SPiCE, CMMI and others) have been updated!

Version 3.3.0 is 100% backward compatible to our previous releases, version 3.2.x and also to 3.0.3 (without Advanced Practices).

Starting with Software Version 3.3.0 there is a build-in Rule-Checker for the SPiCE 1-2-1 for Automotive PAM 3.x tool, which can trigger errors and warnings when you check the consistency of your ratings according to a guideline. All rules are checked, which are free of contextual information and rely only on the given PA/BP/GP rating.

A new feature 'bested' reporting templates' for Word allows to design complex reports with less effort.
